Corporate Profile **2013**

A Globally Expanding Digital Consumer Electronics Market Where Funai Realizes its Full Potential

Tetsuro Funai
Chairman

Tomonori Hayashi
President and CEO

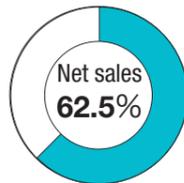

Funai Electric provides the market with reasonably priced, high-quality digital consumer electronics in spite of the growing demand and the intense competition that continue to drive prices downward. We feel, however, that intense price competition also presents us with an opportunity to realize our full potential.

Since our founding in 1961, we have believed in being innovative and sticking to the basics, and Funai will renew its focus on improving efficiencies in all business activities. Based on market analysis, we will promptly develop products to meet market and customer needs. Furthermore, we will provide products in a timely manner that will be superior in terms of cost efficiency using our proprietary production system, the Funai Production System (FPS), and the optimization of production facilities.

In the year ending March 31, 2014, we will strive to accelerate the Group's globalization further acquiring new businesses, taking the next steps toward becoming a truly "global Funai."

Display Business

LCD TVs

**High-Quality,
Reasonably Priced Products for the World**

Through the four business segments in which we develop products—Displays, Digital Media, Office Solutions and Others—we consistently supply products globally under diverse brands but with high levels of quality and cost efficiency. Funai aims to continue improving its competitiveness amid an upheaval in the digital consumer electronics industry.

In addition to continually improving quality and cost efficiency since its founding, Funai's strength lies in its exceptional supply capabilities which have earned us an enormous amount of trust throughout the digital consumer electronics industry.

Currently, we conduct business in four areas: Displays, which handles LCD TVs; Digital Media, which handles DVD and Blu-ray Disc-related products, among others; Office Solutions, which handles printers; and Others, which handles the PHILIPS-brand audio accessories we are rolling out, as well as antennas and other items via Group company DX ANTENNA CO., LTD.

In our mainstay area, the Display Business, we provide the market with five brands of compact to large LCD TVs sold in Japan and overseas. In the Digital Media Business, the Company is enhancing its lineup of Blu-ray Disc-related products through such means as reinforcing its business under OEM* agreements. The

high quality and reasonable price of these products have been well received both domestically and overseas and we proudly maintain a top share in the North American market for LCD TVs and in Japan for Blu-ray Disc recorders.

In the Office Solutions Business, we are increasing sales and profits by maintaining strong relationships with OEM partners, as well as by expanding sales of products we have developed ourselves.

The digital consumer electronics industry is going through a period of significant upheaval. In terms of functionality, design and price, South Korea, China and Taiwan are rapidly becoming increasingly competitive. This situation, however, also presents us with an opportunity to fully realize our potential. Funai's focus will be to increase its brand value and share by providing the market with competitively priced products developed and produced quickly in response to the various needs of consumers around the world.

TOPICS

2012-2013

January 2013

Agreement to Acquire Philips' Lifestyle Entertainment (LE) Business

Funai reached an agreement to acquire from Philips its Lifestyle Entertainment business, which handles items such as audio video multimedia products, home communications products and accessories products.

In September 2008, we entered into a brand licensing agreement to take responsibility for sourcing, distribution, marketing and sales activities involving Philips consumer televisions in the United States and Canada. Following this agreement, in July 2012 Funai entered into a sales agreement involving products with Philips that Philips

designed and developed through the LE business. We commenced sales of these products in the United States, Canada and Mexico in September 2012.

Philips maintains global sales channels in Europe, as well as in emerging companies including those in Asia and South America. By combining these sales routes with Funai's strong routes in North America, in addition to increasing the number of products it provides, the current acquisition allows Funai to expand its sales area.

March 2013

Funai Subsidiary Receives Two Awards from Walmart of the United States

Funai's sales subsidiary, FUNAI CORPORATION, INC., received from Walmart of the United States the 2012 Supplier of the Year Award, as well as a newly established General Award for responsibility.

Funai was chosen to receive these awards for contributing to growth of Walmart's business and customer relationships, as well as for the manufacture of highly sustainable products.

March 2013

Funai Subsidiary Receives Award from Sam's Club in Mexico

Funai sales subsidiary P&F MEXICANA, S.A. DE C.V., received the 2012 Supplier of the Year Award from Sam's Club of Mexico for its superior contribution to the company's sales.

January 2013

Exhibiting at the 2013 International Consumer Electronics Show

The 2013 International Consumer Electronics Show (CES) was held in Las Vegas, Nevada, for four days from January 8 to January 11, 2013.

The Funai booth was located in a hotel near the main venue. Our booth contained PHILIPS- and MAGNAVOX-brand products and technologies, showcasing our extensive lineup and technological expertise and demonstrating our overall capabilities. In particular, the PHILIPS booth displayed our substantially increased our offerings of headphones and other LE business products, attracting attention at the exhibition.

October 2012

Sales Launch of e-LIMO LED Lighting in Japan

Funai has commenced the sale in Japan of e-LIMO-brand LED lighting.

In addition to LED lighting's advantages of having a long service life and being energy saving, we manufacture these products at an overseas factory where we have introduced the Funai Production System (FPS), a proprietary manufacturing system. Consequently, we are able to sell these products at a much more reasonable price than leading domestic manufacturers. We conduct development and design in Japan, and we work with partner companies at the construction stage to prevent accidents, ensuring that these products are supplied in a highly stable manner.

Fifth Year of Co-Sponsorship of the U.S.-Japan Youth Baseball Exchange Program

July 2012

The Boston Red Sox Foundation is an official charity run by the Boston Red Sox baseball team. This is the fifth consecutive year that Funai Electric has co-sponsored the U.S.-Japan Youth Baseball Exchange program, which is sponsored by the Boston Red Sox Foundation.

In July 2012, 12 players from youth teams in Kyoto and Chiba visited Boston, where they participated in an international exchange and enjoyed home stays, baseball lessons, and other various activities.

Agreement to Acquire Inkjet-Related Technologies and Assets from Lexmark

April 2013

Funai entered an agreement to acquire from Lexmark its inkjet-related patent rights and other related technologies, as well as assets. For approximately 16 years, since July 1997, Funai has undertaken the commissioned production of hardware for inkjet printers from Lexmark, collaborating from the development stage.

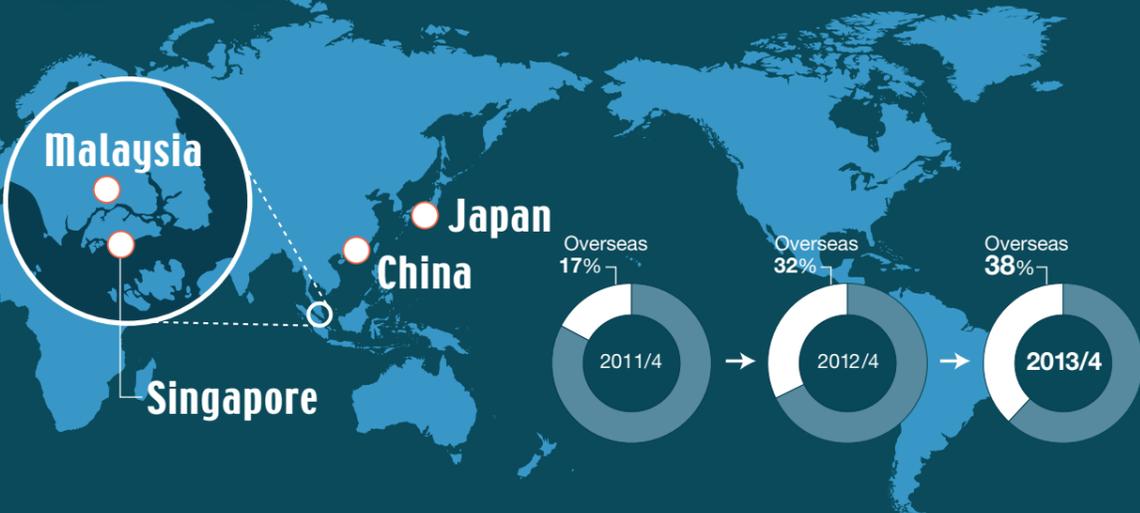

In addition to patent rights, product development functionality and technologies on printer-related products including inkjet cartridges, which Funai has worked on with Lexmark for many years, particularly in North America, we have acquired manufacturing functions and technology, including an ink cartridge plant in the Philippines. Whereas in the past we developed the hardware business merely through commissioned production, this acquisition enables us to create a system that consolidates our resources, including in the production and sale of highly profitable ink cartridges.

Overseas Employment Ratio for Design Staff (As of April 2013)

38%

Design

World-Class Price Competitiveness

We are pursuing thorough cost efficiency at the design stage by various means, including in-house production of core items, reducing part numbers and performing design at overseas facilities.

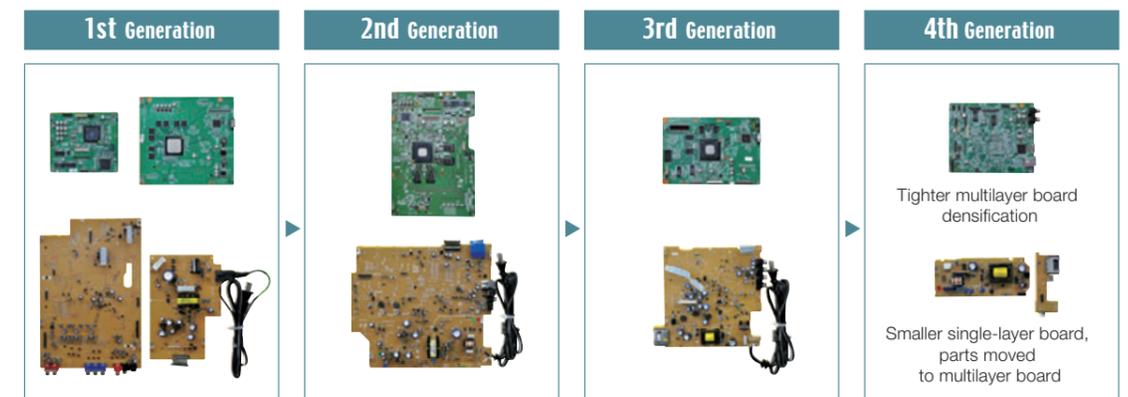

We are working to cut costs by promoting in-house production of core items, reducing the number of parts and reviewing materials used. We are also reducing the number of production processes to achieve substantial productivity increases, using lead-free solder and making other environmentally conscious moves, and pursuing designs

that make production easier.

We are also globalizing development by shifting design responsibilities from Japan to our R&D facilities in such locations as Malaysia, China (Shenzhen) and Singapore.

This structure will help us counter intense cost competition in order to offer the world's most reasonable prices.

Part Number Reduction Case Study

Global Production System

6 Countries, **7** Facilities

Production

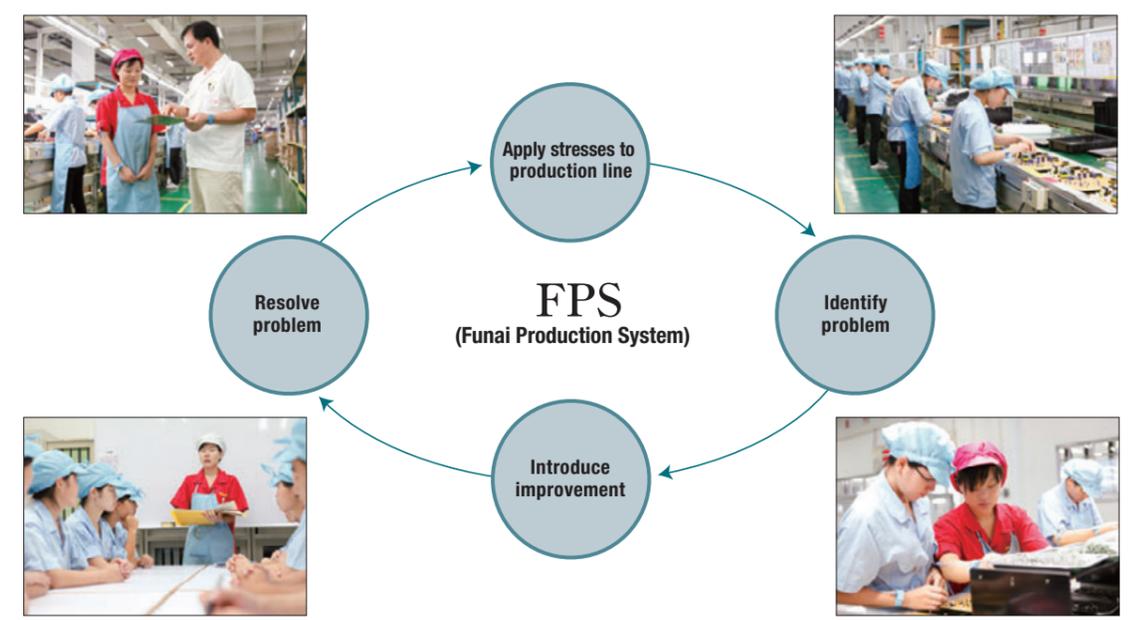

Endless Pursuit of Production Efficiencies

The Funai Production System (FPS) — our unique system of ongoing improvement where problems are identified through stresses applied to production line— continually pursues improved productivity.

Funai Electric concentrates its production facilities in the most appropriate locations and enhances cost competitiveness by purchasing parts in bulk. In particular, our production facilities are concentrated in the Asian region, where we have the ability to competitively procure raw materials and parts as well as secure a low-cost, high-quality labor force. Due to the recent labor shortages and wage increases in China, we have augmented our Thai plant. At the same time, we have acquired land on the island of Luzon in the Philippines for a new production facility and we expect to become operational in 2014. In addition, in April 2013 we acquired an ink cartridge plant on

the island of Cebu from Lexmark. We employ the Funai Production System (FPS) at all of our plants. This system creates stresses on the production line, such as by reducing the number of operators or increasing the speed of the conveyor belt, until conditions are created resulting in the stoppage of the production line. The FPS creates these conditions in order to analyze what causes the line to stop, then improves on those conditions that caused the failure. By repeating this cycle, Funai expects to recognize continuous improvements in productivity.

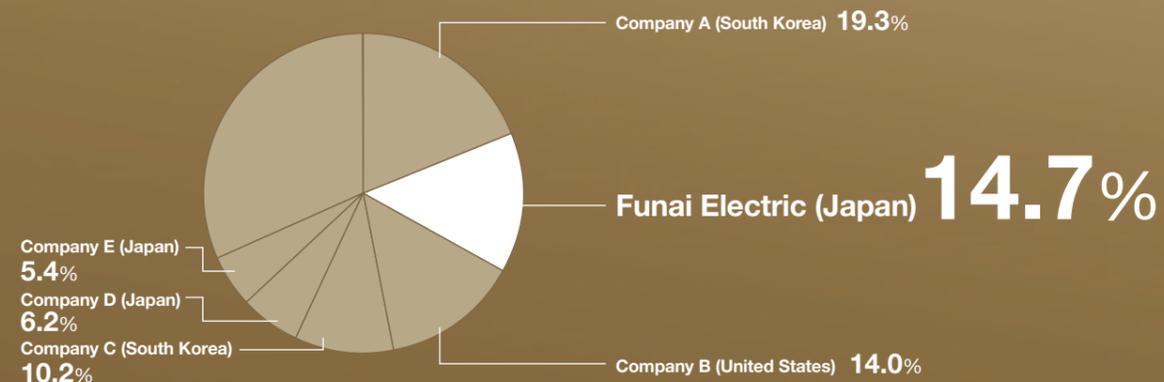

Ongoing Productivity Improvements With the Funai Production System (FPS)

Second in North America

Sales & Marketing

Understanding Market Needs All over the World

Funai Electric endeavors to maintain strong relationships with sales channels such as mass retailers, around the globe and is proud to claim a top share in North America, the world's largest market. In 2012, we established a sales company in India. Going forward, we are also planning to enter high-growth emerging markets in ASEAN countries and in the Near and Middle East.

The key to obtaining a top share in the North American market, the largest market in the world, is creating close relationships with the major mass retailers.

In Europe, we established sales offices in Hamburg, Paris and Warsaw, and are working to strengthen relationships with the major mass retailers in each country.

In Japan, we aggressively develop sales activities through our subsidiary, DX ANTENNA CO., LTD.

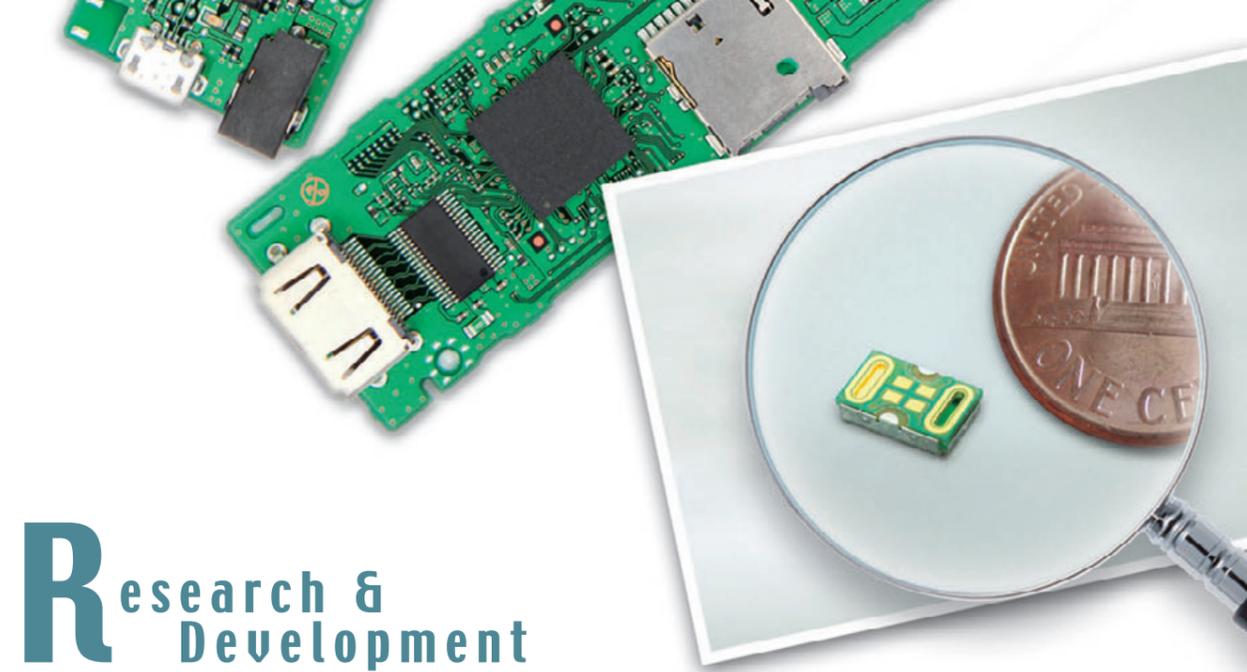

Furthermore, in 2012 we established a local subsidiary

in Mumbai, India, and initiated sales there. Going forward, we expect to increase sales in Latin America, including Mexico. In addition to Thailand, where we commenced sales in 2012, we plan to enter emerging markets that are rapidly growing, such as those in the ASEAN and Near and Middle East regions.

In addition, we plan to further expand our sales region going forward by acquiring the LE business of Philips and the inkjet-related assets of Lexmark.

Brand and Product Development by Region

Research & Development

Expanding into New Growth Markets

Given the rapid changes that are taking place in mobile network environments, we have entered an era of dispersed functionality over the Internet. We are pursuing technological developments that will make it possible to provide devices and services that make new lifestyles more bountiful than ever.

The R&D Division promotes technical development involving the services and software that will be required during the era of cloud services and full-fledged broadband environments. We are also working on "ultra AV home electronics," which feature superior human interfaces. The division is concentrating on the development of devices and software that will help realize interfaces with a human touch. These are expected to be core technologies

supporting future products.

A number of new patent portfolios are being created that employ technology to combine equipment with dispersed functionality using the Internet. We will quickly introduce an intellectual property strategy that employs an open platform basis, representing a major change from a conventional intellectual property network based on standardization.

Current Core Businesses

Technology Related to Next-Generation Smart TVs

The Group pursues a wide range of development activities, spanning fundamental technologies to products. We are dynamically pursuing the development of elemental technologies that are slated for use in next-generation smart televisions, including high-definition LCD panel technologies, multivision, hybrid casting and wireless transmission technologies. In 2013, we began developing and

selling to telecommunications carriers products related to stick-type smart TV devices. These products employ a number of new technologies that differentiate us from competitors, such as video transmission technology for mobile devices. Going forward, this is expected to become a major growth field, in line with changes in the broadcast transmission framework.

Looking Toward the Future

The Field of Healthcare/Life Management

In line with the graying of society, demands are mounting for solutions that support seniors' ability to proactively participate in society, as well as preventive healthcare devices and software. We are responding to this strong market demand by developing products that apply robotics technologies. We are participating in a project sponsored by Japan's Ministry of Economy, Trade and Industry to promote the development and introduction of robotic nursing care devices. Through this effort, we are cooperating with and pursuing the development of safety and standardized

performance evaluations on leading-edge robotic care devices.

Meanwhile, in the area of security and healthcare we are focusing on the development of technologies for smart houses, which employ a variety of highly advanced automatic systems to provide living spaces that are healthy, safe and secure. In the field of sensor network technology, we are conducting research with multiple universities on systems and devices that combine body sensors and working to quickly commercialize these products.

The Field of Automotive/Human Interfaces

In the field of optical disc devices, Funai has pursued leading-edge technology development and commercialization through its long years of involvement in Blu-ray Disc related products. We are applying the technology that we have cultivated in this arena to products that provide automotive-human interfaces. As a result, we plan to develop and commercialize human interface devices in

areas for which expectations for the future are high, such as electric vehicles and healthcare.

By making devices more sophisticated and easier to understand and operate than ever before, we are concentrating on the development of human interfaces that people will find more enjoyable and intuitive.

FUNAI ELECTRIC ADVANCED APPLIED TECHNOLOGY RESEARCH INSTITUTE INC.: A Group Company Responsible for the Development of Advanced Technology

The Funai Group manages the FUNAI ELECTRIC ADVANCED APPLIED TECHNOLOGY RESEARCH INSTITUTE INC., which serves as a base for conducting leading-edge research and technological development.

As a base for leading-edge technology development and a control center for industry-academia and industry-industry R&D collaboration, the institute conducts research related to energy, healthcare and next-generation displays.

History

- Aug. 1961 ● FUNAI ELECTRIC CO., LTD. was established in Ikuno-ku, Osaka capitalized at ¥20 million.
- Mar. 1964 ● CHUGOKU FUNAI ELECTRIC CO., LTD. was established as a production subsidiary in Fukayasu-gun (now Fukuyama), Hiroshima.
- Sep. 1976 ● The head office was relocated to Daito, Osaka.
- May 1991 ● FUNAI CORPORATION, INC. was established as a sales subsidiary in New Jersey, U.S.
- Mar. 1992 ● HIGHSONIC INDUSTRIAL LTD. (now FUNAI ELECTRIC (H.K.), LTD.) was established in Hong Kong, China.
- Jan. 1996 ● FUNAI SERVICE CO., LTD. was established as a service subsidiary in Higashi-Osaka, Osaka.
- May 1996 ● HIGHSONIC INDUSTRIAL LTD. (now FUNAI ELECTRIC (H.K.), LTD.) established H.F.T. INDUSTRIAL LTD. by joint investment with a Japan company.
- Feb. 1999 ● FUNAI ELECTRIC CO., LTD. was listed on the Second Section of Osaka Securities Exchange.
- Mar. 2000 ● FUNAI ELECTRIC CO., LTD. was listed on the First Section of Tokyo Stock Exchange and the First Section of Osaka Securities Exchange.
- Nov. 2001 ● Acquired the majority stocks of DX ANTENNA CO., LTD. in Japan.
- Jul. 2003 ● FUNAI (THAILAND) CO., LTD. was established as a production subsidiary in Nakornratchasima, Kingdom of Thailand.
- Dec. 2003 ● HUANG JIANG PLANT in Dongguan City, Guangdong Province started operations as a consignment production plant in China.
- Apr. 2004 ● FUNAI ELECTRIC ADVANCED APPLIED TECHNOLOGY RESEARCH INSTITUTE INC. was established.
- Oct. 2006 ● FUNAI ELECTRIC (POLSKA) Sp. z o.o. (now FUNAI ELECTRIC EUROPE Sp. z o.o.) was established as a production subsidiary in the city of Nowa Sol, Poland.
- Oct. 2007 ● FUNAI SERVICE CORPORATION was established as a service subsidiary in Ohio, U.S.
- Jun. 2008 ● P&F USA, Inc. was established as a sales subsidiary in Georgia, U.S., for PHILIPS brand consumer TVs.
● Tetsuro Funai, President and CEO, assumed the post of Chairman. Tomonori Hayashi, Senior Executive Officer, assumed the post of President and CEO.
- Apr. 2009 ● P&F MEXICANA, S.A. DE C.V. was established as a sales subsidiary in Mexico.
- Feb. 2012 ● Funai India Private Limited was established as a sales subsidiary in Mumbai, India.
- Jun. 2012 ● Zhong Shan Funai Electron Co. was established as a production subsidiary in Guangdong Province, China.
- Apr. 2013 ● Acquired FUNAI ELECTRIC CEBU, INC. (the former Lexmark International (Philippines), Inc.) from Lexmark.

Funai Group Code of Conduct

All members of the Funai Group (hereinafter "We") pledge to make a sincere effort to observe the following code of conduct. Senior management recognizes that it is their role to embody this code of conduct, and that they must take the initiative and set an example for others in the company to follow. In the event their conduct is in opposition to this code, it will be their responsibility to correct themselves publicly and ensure such conduct is never repeated.

- We shall develop and provide products and services useful to society with sufficient consideration for the safety and privacy of personal and customer information, and strive to earn the trust and satisfy the needs of consumers and customers while ensuring the healthy development of society.
- We shall engage in fair, transparent and free competition and transactions while maintaining a healthy and proper relationship with politicians and political administrations.
- We shall ensure management transparency and health through the timely, proactive and fair disclosure of Company information aimed at widening the communication channel with shareholders and greater society.
- We shall maintain a safe and comfortable work environment where employee diversity, character and individuality are respected.
- We shall respect fundamental human rights and do not engage in discriminatory actions or human rights violations. We do not sanction child labor or forced labor.
- We shall voluntarily engage in initiatives aimed at mitigating environmental problems, which we see as common challenge facing all humanity, and recognize as a necessary activity of all corporations.
- We shall aggressively promote social contribution activities as a good corporate citizen.
- We shall firmly oppose anti-social forces or groups, block all ties with them and reject their undue claims.
- We shall observe international law and local ordinances in terms of our international business activities, always respecting local cultures and customs to develop business efficiently.

June 22, 2012
Tomonori Hayashi President and CEO

Environmental and Occupational Health and Safety Charter

Basic Ideas

In keeping with our corporate commitment "to adopt continual product improvements, to continually promote ever deeper trust, and to seek further harmony and mutual prosperity," all employees of Funai pledge to remain aware of the need to protect the environment and to operate our business in an environment-friendly manner.

We shall provide our customers with simple, high-quality products and shall make an effort to use resources effectively, minimize waste, and reduce our environmental impacts. In short, we remain committed to contributing to a society that remains in harmony with nature.

We shall respect employee diversity, personality and individuality, and provide an environment that is safe and conducive to work.

Environmental Policies

- We shall practice ethical management and comply with all laws and regulations.
- We shall take the initiative in voluntarily eliminating the use of hazardous substances and shall offer environment-friendly products.
- We shall establish goals for environmentally conscious design and shall offer environment-friendly products.
- We shall implement initiatives to attain zero emissions.
- We shall establish environmental goals, conduct periodic reviews, and implement continual improvements.
- We shall provide all employees with environmental education and shall strive to adopt environmental improvements.

Occupational Health and Safety Policies

- We shall practice ethical management and comply with all laws and regulations with respect to occupational health and safety.
- We shall look into occupational health and safety risks in the workplace to prevent injury and illness to employees and visitors.
- We shall make ongoing improvements to occupational health and safety management, while making an effort to improve occupational health and safety performance.

Funai Group Procurement Policy

Basic Policy

The Funai Group is responding to heightened societal demand for corporate social responsibility (CSR) by performing its daily business activities on the basis of the Funai Group Code of Conduct. We have established the basic policies described below with regard to our parts and materials procurement activities.

- Conform with laws, regulations and social norms, and pay attention to environmental preservation.
- Conduct fair and equitable transactions.
- Strive for mutual cooperation with business partners and build trust-based relationships.

Procurement Partner Selection Standards

In accordance with the above-mentioned basic policy, when selecting companies as procurement partners the Funai Group gives priority to those that satisfy the following conditions when commencing transactions.

- Conformance with laws, regulations and social norms
- Respect for human rights, occupational health and safety
- Environmental consideration
- Construction of systems to ensure excellent product quality
- Provision of parts, materials and services that are priced appropriately and competitively
- Construction of systems to ensure certain delivery dates and stable supply

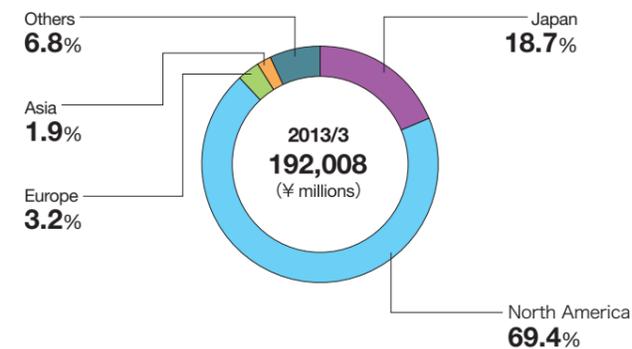

CSR Procurement

From a CSR perspective, we ask our business partners to perform the following. We also ask our customers' business partners to understand the Funai Group Procurement Policy and to make requests that will promote these items.

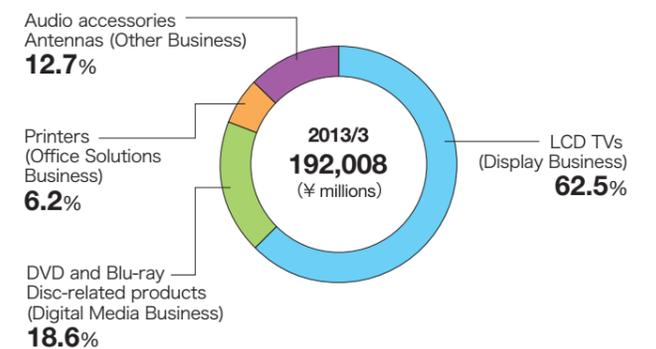

- Conformance with laws, regulations and social norms
- Respect for human rights, occupational health and safety
- Environmental consideration
- Optimal product quality and cost assurance
- Construction of systems to ensure certain delivery dates and stable supply
- Technological improvement
- Confidential information management
- Cooperation in reporting and auditing
- Response to conflict mineral issues
